

Taylor Medical Group — Staff Follow-Up List

Taylor AI Receptionist — Call Review | May 15–17, 2026

Prepared by: Operations System

Action Required By: Staff — Please address all Priority 1 items today

PRIORITY 1 — IMMEDIATE FOLLOW-UP REQUIRED

CALL 1 — BOOKING FAILURE (Application Error)

Caller: +1 (910) 545-9839

Call Duration: 11 minutes 21 seconds

Date/Time: May 15, 2026

What Happened: Patient “ISTL Morgan” (likely a name recognition error — real name unclear) spent 11 minutes on the phone. Taylor successfully verified identity, found the patient record (email: comccee@yahoo.com, phone: 910-545-9839), and offered appointment slots. Patient selected **Monday May 18 at 3:00 PM with Dr. Eldred Taylor**. At the moment of booking, Taylor returned: “*We are sorry. An application error has occurred. Goodbye.*” — and disconnected. **The appointment was NOT booked.**

Staff Action Required:

- Call back +1 (910) 545-9839 immediately
- Confirm the patient’s real name (Taylor misheard it as “ISTL Morgan”)
- Book their appointment for an iron infusion — they requested Monday May 18 at 3 PM with Dr. Eldred Taylor
- Verify if they are in IntakeQ and send portal invite if not

Root Cause (Technical): IntakeQ booking API call failed mid-transaction. This is a code-level bug — flagged for fix.

CALL 2 — FRUSTRATED PATIENT, PRESCRIPTION REFILL UNRESOLVED

Caller: +1 (954) 658-8867

Call Duration: 2 minutes 30 seconds

Date/Time: May 15, 2026

What Happened: Patient called needing a **prescription refill**. Taylor repeatedly asked for name spelling instead of routing the refill request. Patient became visibly frustrated: *“I need to talk to a human, not you.”* and *“You’re an idiot.”* Call ended without the refill being processed or a message being taken.

Staff Action Required:

- Call back +1 (954) 658-8867
- Apologize for the experience
- Process the prescription refill request
- Ask if they need anything else and ensure they are on the patient portal

Root Cause (Technical): Taylor’s name-spelling loop triggered before intent was captured. Prescription refill path needs to be accessible without completing full name verification first.

CALL 3 — SAME PATIENT CALLED TWICE, SECOND CALL ALSO FAILED

Caller: +1 (954) 658-8867 (same as Call 2)

Call Duration: 3 minutes 16 seconds

Date/Time: May 15, 2026 (called back ~7 minutes after Call 2)

What Happened: Same frustrated patient called back. Same outcome — Taylor looped on name verification, patient never got their prescription refill addressed.

Staff Action Required: Same as Call 2 above — one callback will resolve both.

CALL 4 — NEW PATIENT INQUIRY DROPPED MID-COLLECTION

Caller: +1 (470) 244-1585

Call Duration: 3 minutes

Date/Time: May 15, 2026

What Happened: Patient **Angela Box** (DOB March 6, 1965, phone 609-377-1434) called to confirm her 1:30 PM appointment was telehealth. Taylor went into a new booking flow instead of confirming the existing appointment. Taylor also failed to correctly capture the phone number — confirmed it as “seven” after multiple failed attempts. Patient stated *“That’s not my account”* when Taylor pulled up a different patient record (706-463-2626 / abutner@winstream.net). Call ended without resolution.

Staff Action Required:

- Look up Angela Box in IntakeQ (DOB 3/6/1965)
 - Confirm her 1:30 PM appointment is marked as telehealth
 - Call her back at 609-377-1434 to confirm
 - Verify the correct patient record is linked to her name
-

CALL 5 — NEW PATIENT INTEREST IN IRON INFUSION, CALL DROPPED

Caller: +1 (404) 735-2310 (Stephanie Olson)

Call Duration: 1 minute 53 seconds

Date/Time: May 15, 2026

What Happened: New patient **Stephanie Olson** called asking about iron infusions. Taylor began collecting new patient information, then the call ended abruptly mid-sentence. No appointment was booked, no follow-up information was captured.

Staff Action Required:

- Call back +1 (404) 735-2310
 - Explain iron infusion services and pricing
 - Schedule a new patient evaluation appointment
 - Send patient portal invite to her email once collected
-

CALL 6 — CALLER TRYING TO REACH FRONT DESK / STAFF MEMBER

Caller: +1 (619) 377-1434 (approximate — number unclear from transcript)

Call Duration: 1 minute 54 seconds

Date/Time: May 15, 2026

What Happened: Caller repeatedly said “*Front desk*” and “*Dr. Taylor*” — appeared to be calling to speak directly with staff, possibly a vendor, referral partner, or internal caller. Taylor treated them as a new patient and attempted to collect name/email. Caller gave name as “No-No” (clearly not cooperating with the flow). Call ended without resolution.

Staff Action Required:

- Review if this was a known vendor, partner, or staff member calling in
 - If a patient, call back and route appropriately
 - Note: Taylor needs a “transfer to staff” or “leave a message for the doctor” path for these calls
-

PRIORITY 2 — MONITOR / NO IMMEDIATE ACTION NEEDED

CALL 7 — CALLER DID NOT RESPOND (Silent Call × 3)

Caller: +1 (617) 458-7298

Call Duration: 66 seconds

What Happened: Taylor greeted the caller three times with no response. Caller never spoke. Likely a pocket dial or robocall.

Action: No follow-up needed unless this number calls again.

CALL 8 — CALLER DID NOT RESPOND (Silent Call × 3)

Caller: +1 (504) 782-5643

Call Duration: 64 seconds

What Happened: Same pattern — Taylor greeted three times, caller said “Hello?” at the

end but call ended. Likely a connection issue.

Action: No follow-up needed unless this number calls again.

CALL 9 — NAME RECOGNITION FAILURE (Farron/Sharon)

Caller: Unknown (102 seconds)

What Happened: Caller's name appeared to be "Farron" or "Sharon" — Taylor could not confirm it correctly after multiple attempts. Call ended without resolution.

Action: No phone number captured. Cannot follow up. Flag as a name recognition bug for Taylor.

CALL 10 — CALLER ASKING FOR KATHLEEN SULLIVAN

Caller: Unknown (118 seconds)

Patient Name: Alice Berdy (or similar spelling)

What Happened: Patient Alice Berdy called asking to speak with "Kathleen Sullivan." Taylor did not recognize this as a staff/provider lookup and instead launched into an IV therapy explanation. Call ended without connecting the caller to the right person.

Action: Identify who Kathleen Sullivan is (staff member? provider? patient?). If a staff member, Taylor needs to be trained to take a message for specific staff.

CALL 11 — LISA LEONARBY — MESSAGE SENT BUT INCOMPLETE

Caller: Unknown

Patient Name: Lisa Leonarby

Call Duration: 97 seconds

What Happened: Taylor collected name and began collecting last name, then abruptly said *"I've sent your message to our team."* The call ended before the reason for the call was captured.

Action: Check if a message was actually sent to staff. If so, follow up with Lisa Leonarby. If not, no contact info available.

ADDITIONAL CALLS — MAY 16–17, 2026

CALL 12 — JESSICA PARKER — APPOINTMENT CALLBACK (May 17)

Caller: +1 (240) 805-8495

Call Duration: 2 min 24 sec

What Happened: Jessica Parker called back about an appointment. She left a voicemail saying she can do **1:00 PM on Monday with Dr. Ava Bell-Taylor** if that slot is still open. Taylor registered her last name as “Tarker” instead of Parker.

Staff Action Required:

- Call Jessica back at 240-805-8495
 - Confirm if 1 PM Monday with Dr. Ava is available
 - Book the appointment and correct her last name to Parker in IntakeQ
-

CALL 13 — SOPHIA AGUILAR — NEW PATIENT, EMAIL CAPTURE FAILED (May 17)

Caller: +1 (647) 268-4151

Call Duration: 4 min 48 sec

What Happened: Sophia Aguilar (new patient, calling from Canada) wanted to book an appointment. Taylor could not correctly capture her email address (sofia@sophiaaguilar.ca) after multiple attempts. Call ended mid-sentence without completing the booking.

Staff Action Required:

- Call Sophia back at 647-268-4151
 - Confirm her email (likely sofia@sophiaaguilar.ca)
 - Complete new patient intake and send patient portal invite
 - Book her first appointment
-

CALL 14 — ALICE ROSE — FRUSTRATED, HUNG UP (May 17)

Caller: +1 (678) 886-8680

Call Duration: 43 sec

What Happened: Alice Rose called and Taylor immediately misheard her name as “in.”

After Alice corrected Taylor multiple times, she said: **“Never mind. You’re AI. You don’t care about us.”** She hung up.

Staff Action Required:

- Call Alice back at 678-886-8680 — this is a retention risk
 - Personally apologize for the AI experience
 - Determine what she needed and resolve it
-

CALL 15 — PUBLIX PHARMACY ROBOCALL (May 17)

Caller: +1 (770) 621-3186

What Happened: Automated call from Publix Pharmacy at Hugh Howell Village. Prescription ready for pickup, \$60.98 due. This is a robocall that reached the Taylor AI line — no patient involved.

Action: No follow-up needed. Note: This number should be blocked to prevent future robocalls from reaching Taylor.

SMS STATUS

Current Status: A2P campaign has been submitted to carriers (IN_PROGRESS). SMS will be fully reliable once carriers approve the campaign (1–5 business days). Until then, email remains the primary delivery method for portal links and confirmations.

SUMMARY TABLE

#	Caller	Issue	Action	Priority
1	+1 (910) 545-9839	Booking crashed — appointment NOT booked	Call back TODAY, book May 18 3PM with Dr. Eldred	URGENT
2 & 3	+1 (954) 658-8867	Prescription refill — patient frustrated, unresolved x2	Call back, process refill, apologize	URGENT
4	+1 (470) 244-1585 (Angela Box)	Appointment confirmation failed, wrong record pulled	Confirm telehealth appt, call back	URGENT
14	+1 (678) 886-8680 (Alice Rose)	Patient hung up frustrated — “You don’t care about us”	Call back immediately, personal apology	URGENT
5	+1 (404) 735-2310 (Stephanie Olson)	New patient iron infusion inquiry dropped	Call back, schedule new patient eval	HIGH
12	+1 (240) 805-8495 (Jessica Parker)	Left voicemail — wants 1PM Monday with Dr. Ava	Call back, book if available	HIGH
13	+1 (647) 268-4151 (Sophia Aguilar)	New patient, email capture failed, booking incomplete	Call back, complete intake, send portal invite	HIGH
6	Unknown	Caller wanted front desk, looped in AI	Review, call back if identifiable	MEDIUM
10	Unknown (Alice Berdy)	Asking for Kathleen Sullivan	Identify Kathleen Sullivan — is she staff?	MEDIUM
7–8	Various	Silent calls / no response	No action	LOW
9	Unknown	Name recognition failure	No contact info — cannot follow up	LOW
11	Unknown (Lisa Leonarby)	Message sent but incomplete	Verify message was received	LOW
15	+1 (770) 621-3186	Publix Pharmacy robocall	Block this number	LOW
